DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 3-23, drawn to a method for inhibiting paracrine and/or autocrine signals utilizing a compound of formula Ia, classified in class 514, subclass 183+.
 - II. Claims 1 and 3-23, drawn to a method for inhibiting paracrine and/or autocrine signals utilizing a compound of formula Ib, classified in class 514, subclass 169+.
 - III. Claims 2 and 3-23, drawn to a method for inhibiting an altered growth state of a cell utilizing a compound of formula Ia, classified in class 514, subclass 183+.
 - IV. Claims 2 and 3-23, drawn to a method for inhibiting an altered growth state of a cell utilizing a compound of formula Ib, classified in class 514, subclass 169+.
 - V. Claims 24-26, drawn to a pharmaceutical preparation and method of making said preparation, classified in class 514, subclass 183+.
 - VI. Claims 24-26, drawn to a pharmaceutical preparation and method of making said preparation, classified in class 514, subclass 169+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions V and I/III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product (see Inventions I and III).

3. Inventions VI and II/IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product (see Inventions II and IV).

4. Inventions I (III and V) and II (IV and VI) are drawn to methods of using and compositions containing structurally different compounds.

5. Inventions I (II) and III (IV) are drawn to different processes of using the claimed compounds.

6. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from under the elected Group for search purposes, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
